

Contents

Chapter 1.	Concepts of Efficiency and Equity in Health Care.....	7
1.	Efficiency.....	7
2.	Equity.....	13
2.1.	Analysing equity.....	13
2.1.1.	Basic elements of analysis.....	13
2.1.2.	Types of goods.....	14
2.1.3.	Policy focus: fair processes vs. fair end-states.....	16
2.1.4.	Characteristics of potential recipients.....	20
Chapter 2.	The Basics of Markets and Health Care Markets.....	23
1.	Introduction.....	23
2.	Conditions for a well-functioning market.....	25
3.	Mechanics of the market.....	27
3.1.	Supply and demand.....	27
3.2.	Demand and supply schedules.....	28
3.3.	Efficiency of the market.....	32
4.	Markets and market failure.....	34
5.	Health care as a commodity and health care markets.....	36
5.1.	Health care as a commodity.....	36
5.2.	Health care markets.....	39
Chapter 3.	Classical Welfare Economics and Market Failure in Health Care Part I.....	41
1.	Introduction.....	41

2. Basic consumer and producer theory.....	41
2.1 Consumer theory.....	41
2.2 Producer theory.....	44
3. Society's economic problem.....	49
4. The three optimality conditions for allocative efficiency.....	51
4.1 Efficient consumption.....	51
4.2 Efficient production.....	53
4.3 Efficient product-mix.....	56
5. The fourth optimality condition: social justice.....	57
6. The market system.....	61
6.1 Returns to scale.....	61
6.2 A freely functioning capitalist economy.....	62
6.3 The relationship between market price and opportunity cost.....	66
6.4 Marginal social benefit and marginal social cost.....	67
7. Society's objectives: efficiency and social justice in health care.....	70
7.1 Efficiency.....	70
7.2 Social justice.....	71
8. The economic appraisal of health care programmes.....	72
Chapter 4. Classical Welfare Economics and Market Failure in Health Care Part II....	76
1. The market system and health care.....	76
2. Sources of market failure: why do we need government intervention?.....	77
2.1. Assumption 1: No increasing returns to scale.....	77
2.2. Assumption 2: No externalities.....	79

2.3 Assumption 3: No market failure connected with uncertainty and/or information problems.....	82
2.4 Assumption 4: The distribution of factor ownership among consumers is correct.....	83
3. Government policies: regulation, taxes/subsidies, direct provision.....	84
3.1. Regulation.....	85
3.2. Provision.....	86
3.3. Taxes and subsidies.....	86
4. Government policies and objectives: an assessment.....	86
4.1. Regulation.....	86
4.2. Provision.....	87
4.3. Subsidies.....	88
Chapter 5. The Principal-Agent Problem in Health Care and Supplier-Induced Demand.....	96
1. Introduction.....	96
2. The principal-agent relationship in health care.....	96
2.1. Standard microeconomic model of the principal-agent relationship, applied to health care.....	96
2.2. Other issues in the principal-agent relationship in health care.....	99
3. Supplier-induced demand.....	103
4. Empirical evidence on supplier-induced demand.....	106
5. A theoretical and empirical study of supplier inducement in NHS dentistry in the UK.....	107
5.1. Limitations of supplier inducement as an explanation of the availability effect.....	108

5.3 Data analysis and results.....	112
6. Mathematical appendix: expectation and Bayes' Theorem.....	113
6.1 Mathematical expectation.....	113
6.2 Bayes' Theorem.....	119
Chapter 6. The Microeconomics of Economic Evaluation of Health Care Programmes I.....	122
1. Introduction.....	122
2. The economic evaluation of health care programmes.....	123
3. Willingness to pay.....	126
3.1. Definition.....	126
3.2. Measuring WTP.....	128
4. Quality-Adjusted Life Years.....	129
4.1. Health state definitions.....	129
4.2. Utility scales.....	131
4.3. Utility measurement.....	132
5. Theoretical foundations of cost benefit analysis.....	133
6. The basic cost effectiveness analysis model.....	135
Chapter 7. The Microeconomics of Economic Evaluation of Health Care Programmes II.....	138
1. Introduction.....	138
2. Recent work on theoretical foundations of cost effectiveness analysis.....	138
3. The decision rules of cost effectiveness analysis.....	140
4. Cost effectiveness analysis and budget maximisation.....	140

5.2. Derivation of testable predictions for inducement.....	111
5. The relationship between cost effectiveness analysis and cost benefit analysis.....	141
5.1 The case of constant WTP per QALY gained.....	141
5.2 The case of diminishing WTP per QALY gained, and individual heterogeneity.....	142
Chapter 8. The Concept of Health Capital and Household Demand for Medical Care.....	145
1. Introduction.....	145
2. Static models of the demand for medical care.....	145
3. Static models of the demand for health.....	146
4. Deterministic life-cycle models of the demand for health	148
5. Stochastic models of the demand for health.....	155
Chapter 9. Empirical Studies of Household Health Investment Behaviour.....	158
Chapter 10. Some Self-Test Questions.....	161
